

VistaPure

Water Purification System

Meet your steri-center's new best friend

The VistaPure Water Purification System provides two grades of high-quality water for steam sterilizers, dental bottles, ultrasonic cleaners and the final-rinse cycle of compatible instrument washers. The system connects directly to the city water supply and sends high-quality water anywhere you need it in the steri-center for easy, on-demand use.

Two grades of the water practices need

For steam sterilizers:

Point-and-shoot wand makes filling sterilizers with autoclave-ready water a breeze. No more lifting heavy jugs of water!

For bottle systems:

Mounted faucet provides non-corrosive bottle-quality (hyperfiltered) water for bottle systems.

Instant Status Monitoring

The VistaPure Water Purification System features an inline TDS meter that monitors water quality — and makes it easy to know when it's time to replace your filters.

No Electricity Required

The VistaPure Water Purification System operates on water and air pressure, so no electricity is required to supply all the high-quality water your office needs!

Environmentally Friendly

The VistaPure Water Purification System doesn't require chemicals, and its efficient design minimizes the amount of wastewater produced during filtration.

Optional Accessories

Instrument Washer Adapter Kit
S3010

BRAVO G4 Auxiliary EV Kit
M7C200012

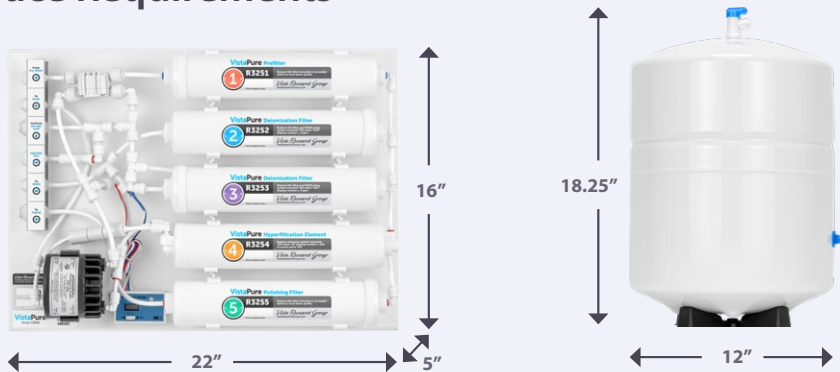

STATCLAVE Adapter Kit
S3015

AutoFill for STATIM Autoclave
