Fast and permanent system.

Reg. No. 1522C2013 SSA  
Pat. No. 299512

# Antivet® Dental enamel cleaning kit

**Antivet®** is specially formulated for the cleaning of teeth with pigmentation (brownish stains) on the surface of the enamel due to dental fluorosis, drinking or smoking.

Its formula based acid, is chemically stabilized to a controlled pH, necessary to react with the positive ions forming salts, which cleans the structure of the enamel of the teeth without affecting it, since it only extracts organic and inorganic substance ions that are occupying the spaces that exist between little calcified crystals of fluorapatite.

The system and the product, are properly patented, in Mexico and several Countries of the world, besides being recommended by the OMS.

## Advantages

- Does not affect the enamel.
- Cleaning the permanent tooth.
- Results in the first session with the dentist.
- No sensitivity occurs.
- Product controlled by Mexican Health Ministry (Cofepris under Reg.1522C2013 SSA.)

The cleaning solution **Antivet®**, has no route of absorption by the human body during the application, testing conducted by research and practice while cleaning the teeth, for this reason there is no toxicity for this if used as the procedure indicated, there is no risk of mutated gene, carcinogenic, teratogenic or degree of accumulation and residual effect.

## Competition and competitive advantage

### Antivet vs other systems

Type of treatment	Only one session needed	Simple application	Will not damage the enamel or structure	No side effects	Permanently removes stain
ANTIVET	✓	✓	✓	✓	✓
Micro abrasion	?	?	X	X	?
Hydrogen peroxide gel (*a)	X	?	✓	✓	✓
Carmabide peroxide gel (*b)	X	?	✓	✓	✓
Porcelain side, plate or sheet	?	X	?	X	✓

**ANTIVET, is the only technology in the world made from materials that do not harm the teeth, nor the environment**
